ABOUT ME

Hi, I'm Adil Khan , a passionate and experienced web developer specializing in creating clean, responsive, and user-friendly websites. My expertise are in front-end development, with proficiency in technologies such as HTML, CSS, JavaScript. Whether you're looking to build a custom website, improve an existing site, or create an entirely new digital experience, I'm here to bring your vision to life with a focus on quality, scalability, and performance.

EXPERIENCE

As part of a personal project, I designed and developed a responsive SeaLife website focusing on user-friendly front-end features. The website was built using HTML, CSS, and JavaScript. I ensured the website was optimized for performance, achieving fast load times and compatibility across various browsers. This project allowed me to enhance my skills in web development, responsive design, and debugging, while also exploring modern frameworks and hosting solutions.
